

Task 3 Report

Submitted by Haseeb Ijaz

o What prompts were used

I generated the slides twice:

1. I pasted video link in Notebook LM and it instantly produced Slides without needing to use any prompt
2. I pasted a video link to Chatgpt but it did not capture the Transcript so I manually had to copy the transcript from youtube and feed it and then wrote a basic slide generation prompt to generate slides.

o Which prompts worked effectively

I prefer the NotebookLM response as it had a native tool in place to do that. I could generate good enough slides without the use of a prompt.

o Which prompts did not work well

Providing just a prompt and link to a youtube video didnt work with Chatgpt. I had to copy the transcript from YT and provide it as context.

o How the prompts were refined

No refinement was needed.

o The complete process followed to achieve the final result

I generated the slides twice:

3. I pasted video link in Notebook LM and it instantly produced Slides without needing to use any prompt
4. I pasted a video link to Chatgpt but it did not capture the Transcript so I manually had to copy the transcript from youtube and feed it and then wrote a basic slide generation prompt to generate slides.

o Which AI tools/models were used

- NotebookLM
- ChatGPT
